christian

Profile

I am a highly motivated and skilled computer science student, specializing in web development, eager to apply my technical expertise and knowledge to contribute value to your team. With a strong foundation in computer science theory and a certificate in web design from FreeCodeCamp, I have gained practical experience in web development, with proficiency in HTML, CSS, and JavaScript. In addition to my web development skills, I hold CCNA certifications in networking and Linux administration, as well as basic knowledge in cybersecurity, software installation, and troubleshooting. I also possess ICT support skills, further enhancing my ability to contribute effectively to various IT-related projects and collaborate with cross-functional teams. I possess excellent communication skills and thrive in both independent and team-oriented environments. My strong attention to detail and passion for delivering quality results ensure that I can make a meaningful contribution to your organization. Furthermore, my highly organized nature enables me to manage multiple tasks effectively, ensuring timely project delivery. I am now seeking a position that will enable me to apply my knowledge, skills, and experience to further develop my technical expertise while contributing to your organization's success.
